## **MRC Polymers Adds New Compounding Line in Chicago Facility**

**August 15, 2014 – Chicago, IL** – MRC Polymers has added a new custom compounding line to its Chicago, IL facility. The new line will add 8 million pounds of capacity.

The addition was made to support the growing olefins business which includes TPO, filled polypropylene and the recently announced unfilled polypropylene line.

The Chicago, IL facility will continue to be the main compounding and finished goods facility for MRC Polymers.

MRC Polymers is the recognized leader in the plastics recycling market in the United States. MRC processes upwards of 50 million pounds of recycled material per year. With over 30 years of proven experience in automotive and other industries, MRC continues to expand and improve its capabilities in the recycled marketplace.
