MRC Polymers Expands to New Facility in Romeoville, IL

April 21st 2014 – Romeoville, IL - MRC Polymers, Chicago, IL continues to expand – adding 100,000 square feet of manufacturing space in Romeoville, IL. MRC has also relocated its headquarters to new office space within the facility.

The expansion will support their new business: MRC Polymers R-Source Division. The R-Source Division is responsible for supplying and sourcing MRC Compounds as well as offering a range of recycling services for industrial businesses. Paper, plastic and packaging materials will be recycled at the new headquarters in Romeoville, IL. This division is also driving the expansion into a new line of unfilled polypropylene compounds.

“Our new facility offers much needed additional space for sorting and size reduction,” explained Paul Binks, CEO MRC Polymers. The facility also offers warehousing and distribution to MRC Compounding and external customers. “The facility is strategically located close to multiple transportation sources and will add several “green industry” jobs to the area,” Binks added.

The current Lawndale facility (Chicago, IL) will continue to be the main location for MRC’s pelletized resin production.

MRC Polymers is the recognized leader in the plastics recycling market in the United States. MRC processes upwards of 50 million pounds of recycled material per year. With over 30 years of proven experience in automotive and other industries, MRC continues to expand and improve its capabilities in the recycled marketplace.
